Cardiovascular risk factors. There are many risk factors associated with coronary heart disease and stroke. Some risk factors, such as family history, cannot be modified, while other risk factors, like high blood pressure, can be modified with treatment.

Factors - AAA Math

A factor is simply a number that is multiplied to get a product. Factoring a number means taking the number apart to find its factors--it's like multiplying in reverse.

Factor Tree Game | Math Goodies

How many people vote is a factor in any election, but it is especially important in this race, according to political scientists. Unlike in a regular citywide election, when contests for mayor or ...

Factors and multiples | Pre-algebra | Math | Khan Academy

How to Factor a Number. A number's factors are numbers which multiply together to form it as a product. Another way of thinking of this is that every number is the product of multiple factors. Learning how to factor - that is, breaking up a number into its component factors - is an important mathematical skill that is...

Factors - AAA Math

Three factors that caused Kansas' historic Big 12 title streak to finally snap. Kansas will not with the Big 12 regular-season basketball title this year for the first time since 2004.
